ABOUT ME

Software Engineering graduate with practical QA experience at Ascend Commerce Group, specializing in manual, API, and SQL testing. Proven track record in developing test automation scripts using JavaScript and Playwright to improve test efficiency and ensure software reliability.

EDUCATION

Mae Fah Luang University

2022 - 2026

Bachelor of Engineering in Software Engineering

Chiang Rai, Thailand

GPAX : 3.33

WORK EXPERIENCE

QA Engineer Intern

Jan 2026 - Apr 2026

Ascend Commerce Group, Bangkok, Thailand

- Executed end-to-end functional testing for a Livestreaming platform, ensuring a seamless user interface and real-time experience for end-users.
- Managed the full defect lifecycle by identifying, documenting, and reporting bugs through JIRA, collaborating closely with developers to ensure timely resolutions.
- Performed data validation by writing SQL queries to verify data consistency between backend databases and frontend displays, ensuring overall data integrity.
- Conducted API testing to ensure all endpoints met technical specifications and validated data accuracy for stable system integration.
- Developing automated test scripts for the Livestreaming module using Playwright and JavaScript, aiming to enhance testing efficiency and expand regression test coverage.

PROJECT

Sentinel-AI-Bot (Automated Trading)

- Developed a Python-based trading bot integrating Binance and Yahoo Finance APIs to fetch and analyze real-time market data.
- Automated alert workflows via the Telegram API, processing market data to deliver real-time signals and monitor performance through a web dashboard.
- Tech: Python, Machine Learning, REST APIs, Telegram API, JavaScript

Pakrung - Mobile Application

- Designed and developed a mobile application using Flutter for trading amulets.
- Features include chants with explanations and benefits, a list of chants, mantras, and reminders to make chanting easier for Buddhists.
- Tech: Flutter , Firebase

MFU-LCMP: Land Cover Mapping Using Deep Learning and Calculated Area for Green Environment

- Researched and applied deep learning techniques for land cover classification, focusing on green space detection in Chiang Rai Province, Thailand.
- Collected and compiled high-resolution satellite imagery datasets from sources such as Hugging Face and Google Earth Pro.
- Developed and trained a semantic segmentation model using Python and EfficientNet.
- Tech: Python, EfficientNet, CVAT

Kin rai dee MFU - Web Application

- Designed and developed a web application to compile restaurants in the Mae Fah Luang University area, enabling students to find new restaurants and view reviews.
- It features a user-friendly and accessible interface.
- Tech: HTML , CSS , Spring Boot , MySQL

SKILLS

Programming Languages:

JavaScript, Python, SQL, Java, C#, Dart

Frameworks / Libraries:

Playwright, Robot Framework, Flutter, PyTorch

Databases:

MySQL, MongoDB

Tools & Platforms:

JIRA, Postman, GitHub, Figma, Firebase
